JOSHUA MAINA

Information Security Analyst | Technical Support Engineer

+254-790-611760 | joshuamaina83@gmail.com | LinkedIn: joshuamaina | GitHub: joshmainaa7 | Nairobi, Kenya

PROFESSIONAL SUMMARY

Cybersecurity analyst and IT support professional with a Bachelor's in Information Technology and hands-on experience in SIEM monitoring, incident response, web application penetration testing, and digital forensics. Proven track record in securing client infrastructure following NIST and ISO 27001 standards, resolving L1/L2 incidents, conducting CIS Benchmark reviews, and deploying security awareness programmes. Skilled in threat detection, log analysis, server hardening, and Python automation.

EDUCATION

BSc Information Technology, KCA University — Second Class Upper Division 2020 - 2024

PROFESSIONAL EXPERIENCE

Information Security Analyst & Tech Support Engineer | Foresight Tech Group Nov 2024 - Present

- Investigated and resolved Level 1 and Level 2 security and infrastructure incidents, achieving a 90% first-contact resolution rate without escalation.
- Monitored client environments using Wazuh SIEM and Rapid7 InsightIDR, performing log analysis, alert triage, and root cause identification to reduce mean time to resolution.
- Led web application penetration tests, digital forensic investigations, and CIS Benchmark configuration reviews across client infrastructure (see Client Engagements).
- Hardened Linux servers and endpoints, managing SSH configurations, host-based firewalls, and access control policies.
- Deployed and administered KnowBe4 security awareness training campaigns for multiple client organisations.
- Validated API security and data integrity using Postman and Python scripts; authored security documentation and incident response procedures.

Security Analyst Intern | Foresight Tech Group May 2024 - Nov 2024

- Triaged and resolved endpoint security and software issues for local and remote users, minimising downtime through proactive monitoring and patch management.
- Documented incidents and remediation steps in Jira, collaborated on cross-functional IT security projects.

Data Annotator | CloudFactory Mar 2023 - May 2024

- Annotated and audited large-scale datasets with 99%+ accuracy, maintaining high-quality outputs for machine learning models.

Research Assistant | PEP - Partnership for Economic Policy Sep 2022 - May 2023

- Conducted literature reviews and background research; assisted in data collection through surveys, interviews, and experiments.

CLIENT ENGAGEMENTS

- **Roamtech:** Conducted web application penetration test on e-commerce platform, led digital forensic investigations on machines suspected in fraud cases, deployed KnowBe4 phishing simulations and security awareness training.
- **Karen Country Club:** Performed CIS Benchmark configuration review across Windows Server and Fortinet firewall infrastructure, ensuring compliance with NIST and ISO 27001 frameworks, delivering hardening recommendations and remediation roadmap.
- **Pula Advisors:** Monitoring Infrastructure Wazuh SIEM for continuous security monitoring and threat detection, served as primary technical support contact.
- **KCB Group:** Deployed and configured KnowBe4 security awareness training platform across the organisation.
- **Zembo (Uganda):** Deployed onsite for infrastructure and technical support engagement.
- **Terrasoft:** Conducted web application penetration test, identifying and reporting vulnerabilities with structured remediation recommendations.
- **Pacis Insurance:** Engineered and deployed EasyNAC (Network Access Control) solution for enterprise-wide device authentication and monitoring
- **PesaLink (IPSL):** Deployed and configured Qualys VMDR and Cloud Agents for monitoring assets and payment transaction infrastructure.

PROJECTS

- **AI-Powered Recon Tool:** Reconnaissance tool powered by an AI agent with MCP for automated attack surface mapping.
- **AI E-Commerce Platform:** Full-stack web app with integrated AI chatbot for customer support and product recommendations.
- **Nmap-Python Scanner:** Python tool for automated network reconnaissance and port scanning.
- **Bug Bounty (HackerOne & Intigriti):** Identified vulnerabilities through authorized security research.

TECHNICAL AND SOFT SKILLS

Security: Wazuh SIEM, Qualys VMDR, Rapid7, Burp Suite, Kali Linux, Server Hardening, CIS Benchmarks, EasyNAC, Digital Forensics, Incident Response
Operating Systems and Infrastructure: Linux, AWS, Kubernetes, SQL, Firebase, Google Workspace Administration and Microsoft 365, DigitalOcean
APIs & Automation: REST APIs, Postman, Python (scripting), Workflow Automation, AI Agent Development, AI Literacy
Developer Tools & Collaboration: Git/GitHub, Jira Administration, Firebase, VS Code, Slack, HTML, CSS, JavaScript

CERTIFICATIONS

EC-Council Certified Cybersecurity Technician | Cisco CyberOps Associate | Rapid7 CTSA: InsightIDR & InsightVM | Qualys VMDR Specialist | Wazuh SIEM: Basic to Advanced | AWS Cloud Computing | HTB Certified Web Exploitation Specialist — In Progress
